AI-Enhanced DSP and Photonic Technologies for Cloud-Scale Communication Systems

Co-located with 15th IEEE/IET *International Symposium on*
COMMUNICATION SYSTEMS, NETWORKS & DIGITAL SIGNAL PROCESSING
(CSNDSP'26)
15-17 July 2026, Edinburgk, UK

Colloquium organizers

Prof. Ioannis Tomkos,
General Chair
Department of Electrical and Computer Engineering University of Patras, Greece Email :
ioannis.tomkos@gmail.com

Dr. Stylianos Sygletos,
Co-Chair
Aston Institute of Photonic Technologies – Aston University
Email: s.sygletos@aston.ac.uk

Technical Program Chairs

Prof Darko Zibar **(TBC)**
Department of Electrical and Photonic Engineering Technical University of Denmark
Email: dazi@dtu.dk

Dr. Raul Munoz **(TBC)**
Centre Tecnologic de Telecomunicacions de Catalunya,
Email:raul.munoz@cttc.es

Prof Massimo Tornatore **(TBC)**
Department of Electronics, Information and Bioengineering at Politecnico di Milano, *Email: massimo.tornatore @polimi.it*

International Technical Program Committee

Dr. Laila Nadal, Centre Tecnol. de Telecomu. de Catalunya (CTTC)
Dr. Pantea Nadimi Goki, Scuola Superiore Sant'Anna-CNIT
Dr. Claudia Hoessbacher, Polariton Technologies
Dr. Luca Poti, Nat. Inter-University Consortium for Telecom. (CNIT)
Prof. Moshe Nazarathy, Technion University,
Prof. Antonio Teixeira, University of Aveiro
Dr. Jose Manuel Rivas Moscoso, Telefonica
Dr. Dimitris Klonidis, Ubitech
Prof. Konstantinos Yiannopoulos, University of Peloponnese
Prof. Michael Logothetis, University of Patras

Dr. Franscesco Da Ros, Technical University of Denmark *(TBC)*
Dr. Sarah Masaad, University of Ghent
Dr. Tanya Panagiotou, University of Cyprus
Dr. Elias Giacoumidis, VPI **(TBC)**
Prof. Dan Marom, Hebrew University of Jerusalem
Dr. David Moor, ETH Zürich
Dr. Yaroslav Prylepskiy, Aston University **(TBC)**
Dr. Fillipe Ferreira, Unicersity College of London **(TBC)**

This colloquium will explore the role of Artificial Intelligence (AI) in advancing communication systems, networks, and digital signal processing (DSP), with a particular emphasis on short-reach interconnects and cloud-scale data center networking. The exponential growth of cloud services, AI/ML workloads, and emerging high-performance applications requires innovative solutions that deliver ultra-high capacity, low latency, scalability, and energy efficiency.

Topics include AI-assisted DSP algorithms for fiber channels, machine learning for photonic device and system optimization, and intelligent resource management. The colloquium will also highlight short-reach optical link technologies, silicon photonics, co-packaged optics, and multi-core fibers, which are vital to next-generation data center and HPC systems. Both theoretical advances and experimental demonstrations are welcome, with a focus on how AI-enhanced DSP and network control can shape the future of flexible, converged, and intelligent communication infrastructures.

According to the above, the topics of primary interest include:

- AI/ML for DSP in communication systems
- Nonlinear impairment compensation and channel equalization using AI/DSP
- Intelligent resource allocation and traffic engineering in data center networks
- AI-enabled modulation, coding, and adaptive transceiver design
- High-speed short-reach optical interconnects for data centers and HPC
- DSP techniques for energy- and bandwidth-constrained short-reach links

- Silicon photonics, co-packaged optics, and optical I/O for cloud-scale systems
- Multi-core/multi-mode fiber technologies for high-capacity short-reach networks
- AI-driven photonic integration and inverse design methods
- Reliability, standardization, and testing of short-reach optical solutions
- Experimental testbeds, prototypes, and field trials for AI-optimized communication systems
- Techno-economic analysis of AI-driven infrastructures

Submission Dates

• Full paper due: 15/01/2026　　•Notification of acceptance: 15/04/2026　　• Camera ready paper: 15/04/2026

Paper format and submission procedure are available at https://eng.ed.ac.uk/csndsp-2026

For further information about this colloquium, please contact: Prof. I. Tomkos (ioannis.tomkos@gmail.com)
For general information about the CSNDSP'26, please contact: Prof. W Popoola, W.Popoola@ed.ac.uk
