

IEEE Copyright transfer:

Before uploading the final manuscript, authors are required to fill out the **IEEE copyright** form.

1. Login to EDAS and click to your paper.
2. Click the link next to the '**Copyright**' © which will open a new page.
3. Click 'IEEE copyright submission' which leads to the pre-populated "IEEE Publication Agreement".
4. Follow the instructions on the page.

Camera Ready Instructions

Step 1: Prepare your revised final manuscript

Address all reviewers' comments and revise your paper accordingly before submitting the final camera-ready version. Please make sure that all Figures and Tables are of high quality and their content is easily readable. Please also make sure that your paper contains no headers, no footers, and no page numbers. This information will be added by the conference publication team.

Step 2: IEEE-Xplore-compatible PDF generation

*Before submission of the final version, papers should be converted to **PDF** and verified to be in the **IEEE Xplore** format. Please use the IEEE PDF eXpress service. The steps for using IEEE PDF eXpress for CSNDSP2026 are outlined below.*

1. Go to the IEEE PDF eXpress website (<https://ieeepdfexpress.org/>)
2. If you do not have an account, Click "Create account",; otherwise login using your email address and password.
 - Use Conference ID: **68462X**
 - Continue to enter information as prompted (You will receive an email confirming the successful creation of your account).
3. Upload either your source file for Conversion or PDF file for checking
4. If there is a problem with your file, you will receive an email detailing the problem(s). Otherwise, the system will email you a copy of your IEEE Xplore compatible PDF file.
5. Download the approved file

Step 3: Final paper submission

Upload the PDF file generated by *PDF eXpress service* via EDAS as the camera-ready version.

Note that PDF eXpress does not check margins, font sizes, or page limit, etc. As a result, a paper generated through PDF eXpress may still fail the EDAS format check and return an error. In this case, address the error/warning and follow step 2 generate PDF file and Step 3 for uploading the paper.
